

— FOR THE PEOPLE WHO RUN THE BUSINESS —

Ask your numbers anything. Get the answer in minutes.

Milo connects to the systems you already run and answers questions in plain English, with the working shown. No SQL, no dashboard backlog, no waiting on a report.

Why did margin drop in the North last month?

4 SOURCES • LIVE

FINANCE

Why did revenue drop last month?

OPERATIONS

Where are we running over on cost?

COMMERCIAL

Which customers are at risk?

MARKETING

Which campaigns bring customers who come back?

THE BOARD

Are we going to hit the quarter?

WORKING WITH

The numbers are all there. Getting an answer still takes a week.

Most businesses have the data. It sits in the finance system, the CRM, the operations platform and a folder of spreadsheets, and the only thing joining it up is a person with a pivot table.

HEARD ON FIRST CALLS

80 hours a month

Building 35 management packs by hand, from exports and pivot tables.

FIELD SERVICES GROUP

10 hours a day

Of combined staff time, producing the daily P&L site by site across the network.

THIRD-PARTY LOGISTICS OPERATOR

100 spreadsheets

"My job is spreadsheets, not operations."

OPERATIONS LEAD, GLOBAL FMCG

WHY IT HAPPENS

The answer lives in five systems

Finance, CRM, operations, marketing and the spreadsheets in between. No one tool sees all of it.

So the question joins a queue

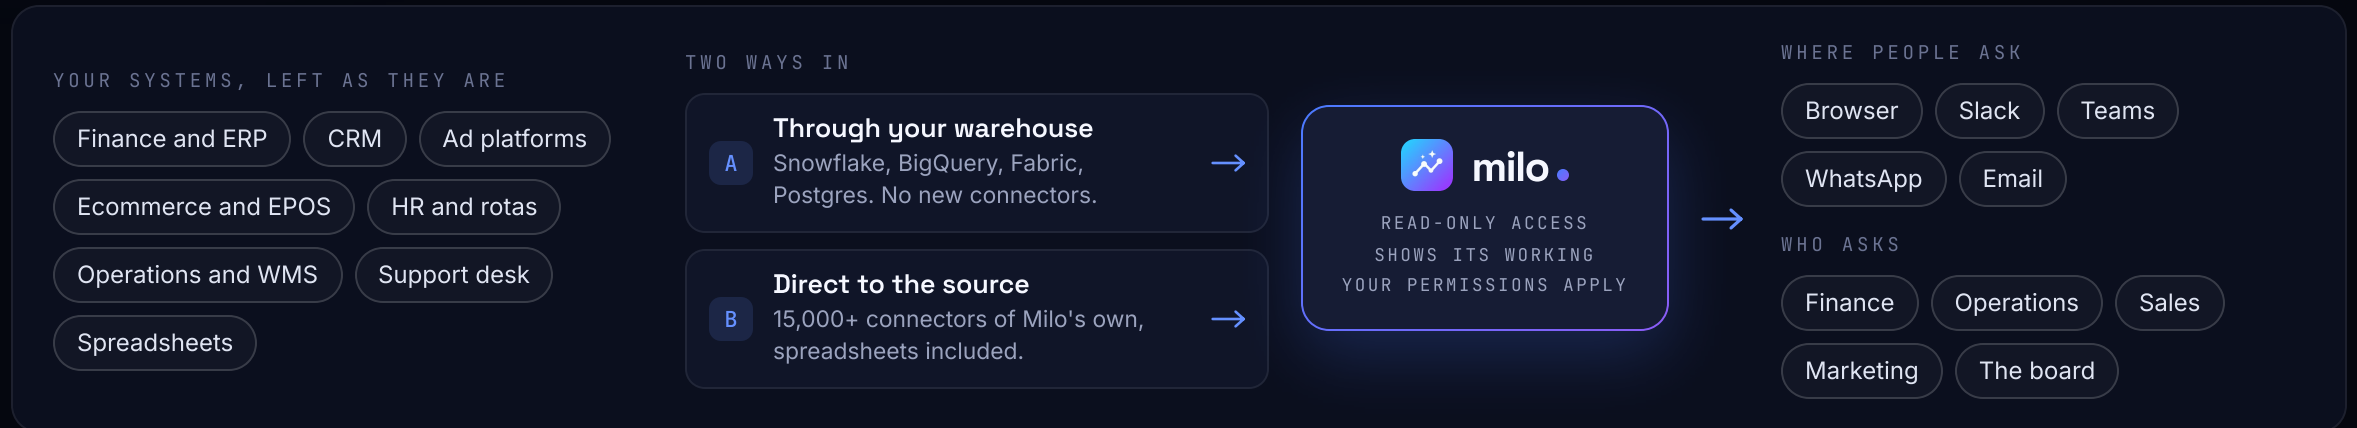

It goes to an analyst, or to the one person who knows the export. The answer arrives after the meeting it was for.

And the dashboard answers last month's question

Dashboards show what happened. Nobody built one for the question that came up this morning, or for why.

One analyst across every system. Anyone on the team can ask it.

01 · JUST ASK

Plain English in, answers out

Type the question the way you would say it. Milo runs it and shows where the number came from.

> Which customers are at risk?

02 · ONE PLACE

Every system, joined up

Finance, CRM, operations and marketing in one view, so one answer can span all of them.

4 sources · finance, CRM, orders, ads

03 · THE WHY

Explanations, not just charts

Milo says what moved and why, with the reasoning shown, so you can act on it in the meeting.

Why · 37 accounts churned in week two

04 · THE NEXT STEP

It offers to do the next thing

Build the list, draft the note, alert the owner. Every answer ends with an offer.

→ Build the at-risk account list

A question, the way you would say it.

An answer with the working shown.

Figures are illustrative. On your own data each answer traces back to the row it came from.

FINANCE

“Why did revenue drop last month?”

Milo 12 sec · 3 sources

Revenue fell **14%** on last month, almost all of it Product B. **37 accounts** churned in week two, against a competitor price cut. Product A held flat.

REVENUE · LAST SIX MONTHS

£1.92m	£2.01m	£2.06m	£1.98m	£2.04m	£1.75m
M	A	M	J	J	A

MILO OFFERED TO

→ Build the at-risk account list

OPERATIONS

“Where are we running over on cost?”

Milo 9 sec · 2 sources

Three sites are **18% over budget** on labour, every one of them since the July rota change. The other eleven are on plan.

LABOUR COST, % OF BUDGET · BY SITE

119%	118%	117%	101%	100%	99%
S1	S2	S3	S4	S5	S6

MILO OFFERED TO

→ Draft the variance note for the ops meeting

COMMERCIAL

“Which customers are at risk?”

Milo 11 sec · 3 sources

Nine accounts have slowed six weeks running and not one has raised a ticket. Together they are **12% of recurring revenue**.

ORDER VOLUME, THOSE NINE ACCOUNTS · INDEX

100	94	89	81	76	68
W1	W2	W3	W4	W5	W6

MILO OFFERED TO

→ Alert the account owners

05 > What happens to our dashboards? ▮

The dashboard layer goes. Milo builds its own, by asking.

GOES Power BI, Tableau, Looker

The weekly pack built by hand

The report queue

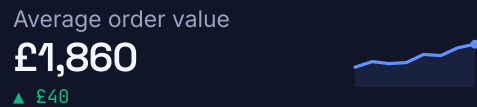

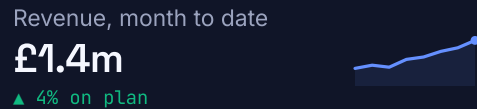

STAYS

Your source systems

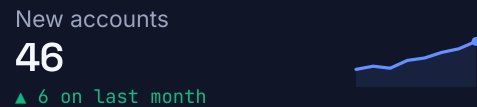

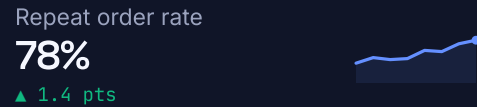

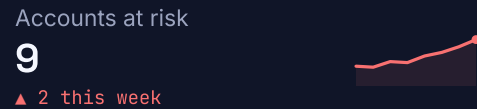

Your warehouse

Copilot, for documents

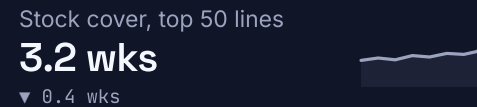

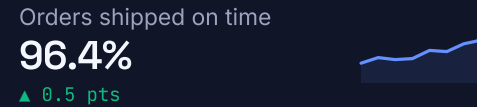

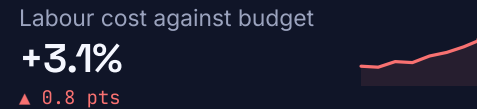

Sales BY CHANNEL, REGION, PRODUCT

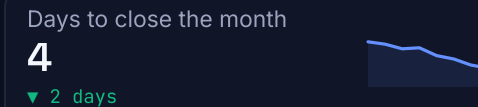

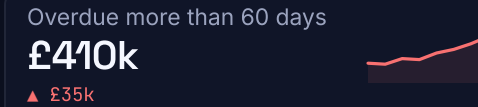

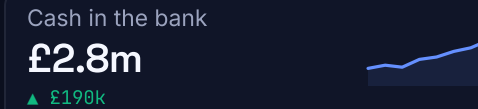

Customers BY SEGMENT, ACCOUNT, COHORT

Operations BY SITE, TEAM, SHIFT

Finance BY ENTITY, CUSTOMER

The 07:00 brief
Yesterday's sales, margin and exceptions, in every manager's inbox before the meeting.

Alerts
A number moves outside its normal range and its owner hears first, with the why attached.

The Monday pack
The weekly management report builds itself, by site, team and customer.

Apps
A price checker, a site leaderboard, a new-openings tracker. Small tools, built by asking.

Built for work that has to stand up to scrutiny.

THE NUMBER • ILLUSTRATIVE EXAMPLE

The model never does the maths.

Milo writes the query, runs it on your data and shows it. Calculations run as code, so the same question returns the same number every time, and every figure traces back to the row it came from.

> What was gross margin by region last month?

```
SELECT region,
       SUM(revenue - cost) / SUM(revenue) AS gross_margin
FROM   finance.invoice_lines
WHERE  invoice_month = DATE '2026-08-01'
GROUP BY region
```

North **38.2%** South **44.8%** Scotland **42.0%** 212,406 ROWS • 0.8 S

THE DATA

Your data stays yours.

Region of your choice

Milo's cloud in the EU or the UK, or inside your own cloud tenant.

Models run inside Milo's cloud

Under zero data retention. Nothing is sent to OpenAI or any outside AI service.

Never trains on your data

Your data answers the question in front of it and nothing else. It is written into the contract.

Your permissions apply

SSO and role-based access, down to row and column level, enforced at the data layer.

Read-only connections

Milo reads from your systems. It never writes to them or changes a record.

Full audit log

Every question, answer and dashboard view is logged by user and time, and can be exported.

The teams already asking. From Kellogg's to a national lottery.

Built first for gaming, where every number gets audited. Now in food, hospitality, vehicle leasing and a national lottery.

WORKING WITH

KELLOGG'S

Dozens of markets

Operations and commercial finance ask Milo directly. It runs inside their own cloud, on their terms.

BETGAMES

3 days → 3 minutes

Report turnaround. Two years on Milo, across 15 TB of live transaction data.

A NATIONAL LOTTERY OPERATOR

Outsourced → minutes

Milo reproduced a predictive report they had been paying an outside firm to produce.

ORBIO

2 days → seconds

The time it takes the business to get a data request answered.

“Being able to answer questions live in management meetings, instead of waiting a week for an analyst.”

OPERATIONS LEADER

“It's like having a data engineering team. I used to have someone proper geeky who did all this. This is like that, but better.”

FOUNDER

“Analysis that took a business analyst weeks now takes two minutes.”

HEAD OF FINANCE

Live in a week. One month to decide.

● DAY 1 TO 2

Connect

Our engineers connect your systems, read-only. Nothing gets replaced, nothing moves and there is nothing new for the team to learn.

● DAY 3 TO 4

Teach

We sit with your team and map how you define things: margin, a live customer, a late order. Permissions get set by role.

● DAY 5

Ask

First answers on your own data, in the browser, Slack, Teams or WhatsApp. Anyone you choose can ask.

● WEEK 2 ONWARDS

Replace

We build the first dashboards, the morning brief and the weekly pack with you, then the team builds the rest by asking.

One month. Ask it anything.

A proof of concept on your own data. If it does not earn its place, walk away at the end of the month.
