

MILO FOR BORG & OVERSTRÖM · OCTOBER 2026

Where is the business leaving money on the table?

The screen in the office shows live sales and the month so far. It doesn't show which partners are slipping, which installed dispensers have stopped reordering filters, or how each series is tracking in the Nordics. Milo connects to NetSuite and Pipedrive and answers in seconds. **Then it tells you what to do about it.**

Connected in about a week · Hosted in Frankfurt · ISO 27001 and SOC 2 · Never trains on your data

WHAT MILO IS

One place to ask about every partner, country and series, built on NetSuite and Pipedrive. Answers, dashboards, alerts and small apps that keep themselves up to date.

HOW IT RUNS

We do the connecting. A named account manager builds your first views with you, then you change them by asking.

WHAT WE'RE ASKING FOR

A one month proof of concept for £1,500. If it hasn't earned its place by the end, you walk away.

Which distribution partners need a call this week?

Two partners need a call. The Oslo partner has ordered 41% less than this time last year and **paid its last two invoices late.** Its open deal in Pipedrive hasn't moved in six weeks.

PARTNER HEALTH · LAST 90 DAYS AGAINST THE SAME PERIOD LAST YEAR

PARTNER	ORDERS VS LAST YEAR	DAYS TO PAY	OPEN DEALS	LAST DEAL ACTIVITY	HEALTH
Oslo partner	-41%	58	1	6 weeks	38 
Rotterdam partner	-22%	44	0	None	52 
Munich partner	-9%	31	2	8 days	66 
Leeds partner	+6%	29	4	2 days	78 
Stockholm partner	+14%	27	5	Today	84 
Dubai partner	+31%	33	3	Yesterday	88 

The Oslo partner's last three orders were **filters and spares only**. No new dispensers since June.

I can send each account owner their partners' health every Monday, and alert you the moment **any partner pays two invoices late in a row.**

[Set up the alert](#)
[Show me Oslo](#)

Where are we leaving money on the table on filters and service?

Nearly 4,200 dispensers sold in the last two years haven't had a filter reordered in twelve months. At trade price that is around £310,000 a year, going to someone else's filters or to no change at all.

INSTALLED IN THE LAST TWO YEARS · SHARE WITH A FILTER REORDER IN THE LAST 12 MONTHS

United Kingdom		86% 6,920 installed
Netherlands		72% 1,640 installed
Germany		66% 2,210 installed
Nordics		48% 2,380 installed
Middle East		39% 1,260 installed

The Nordics and Middle East hold 2,000 of them. The gap is widest on the E6.

I can list the partners with the biggest gap, by series, and add a follow-up to each one in Pipedrive for the account owner.

Create the follow-ups

Show by series

Build me my own view: the Nordics by series, year to date against forecast. Just for me.

The Nordics are 8% behind forecast, and all of it is Sweden. The E6 is ahead. Tap systems are £96,000 short, with £140,000 of tap deals sitting in Pipedrive.

NORDICS · JANUARY TO SEPTEMBER · REVENUE AGAINST FORECAST

SERIES	ACTUAL	FORECAST	AGAINST FORECAST	PIPEDRIVE, WEIGHTED
T1, T2, T3 taps	£412,000	£508,000	-£96,000	£140,000
C2 and C3	£118,000	£131,000	-£13,000	£22,000
E4	£164,000	£172,000	-£8,000	£31,000
E6	£296,000	£261,000	+£35,000	£58,000
B3 and B4	£88,000	£97,000	-£9,000	£12,000
Filters and service	£131,000	£142,000	-£11,000	n/a
Nordics	£1,209,000	£1,311,000	-7.8%	£263,000

Saved. I can send you a snapshot of this every Wednesday at 7am, and add Benelux alongside the Nordics.

Send it on Wednesdays

Add Benelux

ILLUSTRATIVE FIGURES Every number above is sample data shaped like a design-led manufacturer selling through partners, not Borg & Overström's own. During the proof of concept the same questions run on your data.

A view for the whole company, and one for each of you.

Phocas does what it was set up to do: live sales and the month so far, on one dashboard everyone shares. Milo replaces it. Each person gets the views they need, changes them by asking, and gets told when something moves. With Phocas on a short renewal, the switch can line up with the next one.

YOUR OWN VIEW

Change it by asking

"Take out service, put the E6 first, split it by country." Milo rebuilds the dashboard while you watch. No setup screens, no waiting for whoever built it.

IT COMES TO YOU

Alerts, not just screens

A partner paying late twice, a market dropping behind forecast, a Wednesday snapshot of the sales team. Milo sends it to you, with what to do next.

WHO SEES WHAT

Set by role

Margin and company turnover for the people who should see them. Partner managers see their partners. The board pack is ready before the meeting.

	MILO	PHOCAS TODAY
Who it's for	Everyone, each with their own views and permissions.	One company-wide dashboard.
A new question	Asked in plain English, answered with the working shown.	Answered if the dashboard was set up for it.
Why a number moved	Ask, and Milo traces it to the partner, series and order.	Drill down and work it out yourself.
Beyond reporting	Alerts, scheduled snapshots, Pipedrive follow-ups and small apps such as a market forecast.	Reporting.

We connect it. You test it.

You don't need a data team, because we bring one. A named account manager and engineer do the connecting and the first build. Your month starts once everything is connected.

Connect ABOUT A WEEK

BEFORE THE MONTH

Plug in

Pipedrive in about thirty minutes. NetSuite takes a day or so to sync. Read-only, done on our side.

Set up

WEEK 1

Kick-off

An hour, in Norwich, at Moorgate or on Teams. What each person wants to see, and which questions to answer first.

WEEKS 1 AND 2

WEEK 2

Built with you

Partner health, filter and service gaps and your own views, built and saved. Then you start changing them yourselves.

Test

WEEKS 2 TO 4

Try to break it

Bring in sales, finance and the partner team. Check every figure against Phocas and NetSuite. Then decide.

After the proof of concept, **the same account manager and engineer stay with you.** A new market, a new series or a new system: you call them.

What others found in the first months.

GLOBAL FOOD · MIDDLE EAST

Kellogg's

Empty shelves, found

Coco Pops was already the best seller. Milo showed it running out for two or three days at a time in around 25 stores. More stock went in, and more sold.

BREWERY · UK SUPERMARKETS

Two Tribes

Accounts at risk, flagged early

Two late invoices in a row trigger an alert, checked against how much beer that customer is still ordering. The account manager calls before the orders stop.

NATIONAL DRINKS BRAND · HUNDREDS OF BARS

A £50,000 a month promotion

Proved it was working

Tequila sales barely moved, so the spend looked wasted. Comparing bars in the promotion with bars outside it showed beer sales rising across the board. The spend stayed.

CONSUMER GOODS · INTERNATIONAL

Marico

Their own forecasting app

The business behind Parachute and Saffola. Their team built and tested a volume-forecasting app in Milo, without a data team.

Built to keep up with AI. Careful with your data.

THE MODELS

The best one, swapped in

Milo runs on the leading models from OpenAI and Anthropic and moves to each new one as it lands. A full-time engineering team ships improvements every week. You get them without changing anything.

THE NUMBERS

Same question, same answer

The arithmetic is never done by the language model. Milo writes a query, runs it on your data and shows its working, so every figure traces back to the order or invoice.

YOUR DATA

Read-only, in the EU

Hosted in Frankfurt. Milo never writes to NetSuite or Pipedrive, and never trains on your data. ISO 27001 and SOC 2, documents at trust.milo.ai.

05 · COMMERCIALS

One month. £1,500. Then you decide.

A full month on Borg & Overström's own data, starting once NetSuite and Pipedrive are connected. Partner health, the filter and service check and your own views built with you, **and every figure checked against the reports you run today.**

New hires	None
Seat licences	None, unlimited users
Owed after month one	Nothing, unless you carry on
Term after that	Twelve months, with a six-month break if you want one

PROOF OF CONCEPT · ONE MONTH

£1,500

Everything included

- A named account manager and engineer
- NetSuite and Pipedrive connected, read-only
- Your first dashboards, alerts and views, built with you
- Unlimited users

Carry on and it is **£1,100 a month**, with the same account manager and engineer.
