

MILO FOR TINY REBEL • OCTOBER 2026

Volume, revenue and profit, by customer. Ready for Monday.

Sales and stock sit in Unleashed, the money in Xero, the reps in Bowimi, the stores in the retailer data and the webshop in Stripe. Milo joins them up and answers in plain English, for anyone in the business. Then it tells you what to do next.

Live in about a week · £1,500 to try it for a month

· Two Tribes, Prime Time and Dhillon's already run on it

Give me last week for the Monday call. Volume, revenue and margin by channel, against last year.

Last week was 1,184 hectolitres and £398,000 net, **6% up on last year**. Margin slipped 1.6 points, and **all of it is on-trade promotions** in South Wales.

WEEK 40 • BY CHANNEL • AGAINST THE SAME WEEK LAST YEAR

CHANNEL	HECTOLITRES	NET REVENUE	AGAINST LAST YEAR	GROSS MARGIN	MARGIN CHANGE
Retail, the multiples	612	£171,000	+9%	31.8%	+0.4 pts
On-trade, direct	318	£129,000	+2%	38.1%	-4.9 pts
Wholesale	176	£54,000	+1%	27.4%	-0.3 pts
Export	71	£26,000	+22%	24.9%	+1.1 pts
Webshop	7	£18,000	-8%	52.6%	+0.2 pts
Tiny Rebel	1,184	£398,000	+6%	33.7%	-1.6 pts

Clwb Tropica carried the multiples. On-trade margin fell on **three promotions in Cardiff** that ran a week longer than planned.

I can send this to everyone on the Monday call at **7am every Monday**, with a line on anything that moved more than 5%.

Send it on Mondays

Split by customer

Which direct on-trade accounts haven't ordered in three weeks?

41 accounts haven't ordered in three weeks. Last quarter they bought **£23,600** between them, and **nine are also late paying**.

DIRECT ON-TRADE • NO ORDER IN 21 DAYS • BIGGEST FIRST

ACCOUNT	LAST ORDER	USUALLY ORDERS	LAST QUARTER	OVERDUE	REP
Cardiff city - centre bar	34 days ago	Weekly	£2,140	£780	Cardiff
Newport sports pub	29 days ago	Weekly	£1,860	None	Newport
Swansea marina bar	24 days ago	Fortnightly	£1,420	£390	West
Penarth bottle shop	23 days ago	Fortnightly	£980	None	Cardiff
Abergavenny inn	22 days ago	Fortnightly	£760	None	Newport
41 accounts			£23,600	£4,900	

Win back half of them and that is **around £47,000 a year** back in direct on-trade.

I can put each account on its rep's **call list in Bowimi** this morning, and flag any account that goes quiet from now on.

Add to call lists

Show by rep

Where is Clwb Tropica losing sales on the shelf in the multiples?

Clwb Tropica sells **4.3 units per store per week** where it's on the shelf. In **118 stores it sold nothing** for a week or more in September, the pattern of a gap on the shelf, not a weak store.

SEPTEMBER • STORES WITH A WEEK OR MORE OF ZERO SALES • SHARE OF RANGED STORES

Retailer A		14% 52 of 371 stores
Retailer B		9% 31 of 344 stores
Retailer C		8% 22 of 276 stores
Retailer D		5% 13 of 260 stores

Filling those gaps at the normal rate of sale is worth about **£9,800 a month** at your price.

I can send the account manager a **weekly list of stores to raise with each buyer**, and set rate of sale against the Nielsen category once it's connected.

Send the store list

Compare with Nielsen

ILLUSTRATIVE FIGURES Every number, account and store above is sample data shaped like a brewery of Tiny Rebel's size and channels, not your own. During the proof of concept the same questions run on your data.

Everything you already run. Power BI goes.

Getting Unleashed sales into Power BI took a lot of work, and the result still doesn't show what the business needs. Milo connects to every system below and builds its own dashboards, so the reporting doesn't depend on one person.

Unleashed Sales, stock and customers. Connector already built.	Xero Margin, costs and who owes what.	Bowimi Rep visits and call lists. Two Tribes' reps run it with Milo.	Retailer data EDI and portal sales, rate of sale by store.
Stripe Webshop and merch sales.	Excel and SharePoint Budgets, price lists, anything in a spreadsheet.	Nielsen NEW We scope and build this connector with you during the month.	Power BI Replaced by Milo's own dashboards.

	MILO	POWER BI TODAY
A new view	Ask: "show me volume and margin by customer, month to date, against last year."	Back to whoever built it.
Who uses it	Ten to twenty people, each seeing only what their role allows.	A few people who know how it works.
Why a number moved	Milo traces it to the customer, beer and order.	Drill down and work it out.
In Excel	Any table comes out as a spreadsheet when you ask.	Export and tidy by hand.
Beyond reporting	Monday emails, alerts, Bowimi call lists and small apps.	Reporting.

Same channels. Same gaps. Already working.

BREWERY • LONDON • WHOLESALE, TESCO, TAPROOM

Two Tribes

Seven systems that had never spoken to each other, and no data team. Milo connected all of them in two weeks. **Each rep now has an account monitor** with revenue, targets, churn risk and overdue debt on one screen. A Tesco analyser covers **all 831 stores** and flags the ones underperforming. The board pack assembles itself.

"Milo is my work wife."

BETTER-FOR-YOU BEER • RETAIL AND ONLINE

Prime Time

Stock across every retailer, in one answer

Milo joins their sales, CRM and Xero data with retail, direct-to-consumer and marketing data. First question: where is our stock, across all of our retailers, without a round of emails.

GLOBAL FOOD • MIDDLE EAST

Kellogg's

Empty shelves, found

Coco Pops was already the best seller. Milo showed it running out for two or three days at a time in around 25 stores. More stock went in, and more sold.

Want to hear it from a brewer?

We'll set up a call with the Two Tribes team. Dhillon's Brewery in Coventry joined in September.

No code. Start simple, build on it.

Everything is done by asking in plain English. Most teams start with one report, then someone asks for one more thing, and it grows from there.

ASK

Quick answers

"How did Cwtdh do in the multiples last month?" On the web, Teams or your phone.

DASHBOARDS

Shared and live

A board view, a sales view, a view for each rep. Change any of them by asking.

APPS

Built for one job

An on-trade win-back list, an export tracker, a route planner for the reps.

AUTOMATIONS

Runs on its own

The Monday email, an alert when sales dip, call lists pushed into Bowimi.

WHO SEES WHAT

Roles by person: the CFO sees everything in finance, a rep sees their own accounts, and nobody sees salaries by accident, even on a shared dashboard. The model never does the arithmetic, so the same question gets the same answer. ISO 27001 and SOC 2, hosted in the EU, never trains on your data. Details at trust.milo.ai.

04 • GETTING STARTED

Live in a week. Decide after a month.

WEEK 0

Connect

Unleashed, Xero, Bowimi, Stripe and your spreadsheets. Read-only, done on our side. Nielsen scoped in the same week.

WEEKS 1 AND 2

Build

A kick-off in Newport or on Teams. Your account manager and engineer build the Monday pack and the on-trade list with you.

WEEKS 2 TO 4

Test

Bring in sales, finance and the Monday call. Check every figure against Unleashed and Xero. Then decide.

PROOF OF CONCEPT • ONE MONTH

£1,500

Everything connected, unlimited users and use

- A named account manager and engineer
- Every system above connected, Nielsen scoped with you
- Nothing owed after month one unless you carry on

Carry on from around **£1,200 a month** for about 500 interactions, with unlimited users. An interaction is a new question or build. Opening dashboards and running automations don't count.

Usage alerts and caps, so one curious person can't use up the month.
