

AI already runs through logistics. Mostly one system at a time.

Route planners, ETA models and document readers each work inside their own tool. The questions a transport group asks every week cut across all of them: the TMS, the trucks, the fuel cards, the warehouse and the ledger.

PLAN

Routes, loads and dispatch

Optimisers build routes, fill trailers and suggest the next load for each truck.

LIVES IN

The TMS and route optimiser

PREDICT

ETAs, demand and breakdowns

Models forecast arrival times, volumes by lane and which truck needs the workshop next.

LIVES IN

Telematics and the TMS

PROCESS

CMRs, PODs and invoices

Document AI reads consignment notes, proofs of delivery, customs papers and carrier invoices.

LIVES IN

Back-office document tools

ANSWER

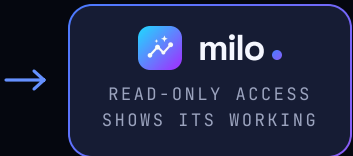

Questions across every system

Margin per km after empty legs. Carrier cost against on-time. Which customers stay profitable once everything is counted.

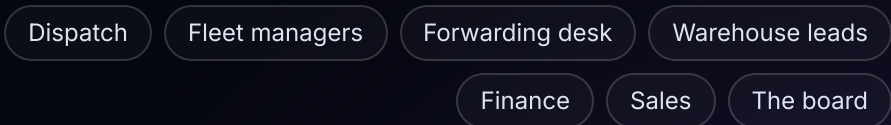

LIVES IN

All of them at once. This is Milo.

YOUR SYSTEMS, LEFT AS THEY ARE

WHO ASKS, IN THE BROWSER, TEAMS OR WHATSAPP

The questions that cross the TMS, the trucks and the ledger.

Figures are illustrative. On your own data each answer traces back to the load, truck or invoice behind it.

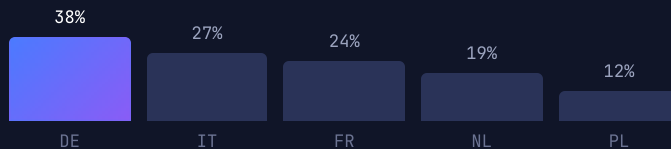

TRANSPORT

“Which lanes lost money last week once empty kilometres are counted?”

 Milo 12 sec

Nine of 140 lanes ran below cost. Kaunas to Duisburg earns €1.42 a km outbound, but the return leg runs **38% empty**, which pulls the round trip to €0.97 against a cost of €1.08.

EMPTY KM · BY RETURN LANE

MILO OFFERED TO

→ Send the backhaul list to the forwarding desk

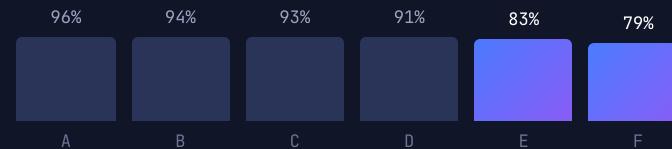

FREIGHT FORWARDING

“Which carriers cost us margin through late deliveries?”

 Milo 9 sec

Two of your six biggest subcontractors deliver on time less than 84% of the time. Together they caused **31% of penalty charges** this quarter, for rates only 3% under the average.

ON-TIME DELIVERY · TOP SIX CARRIERS

MILO OFFERED TO

→ Build the carrier scorecard for procurement

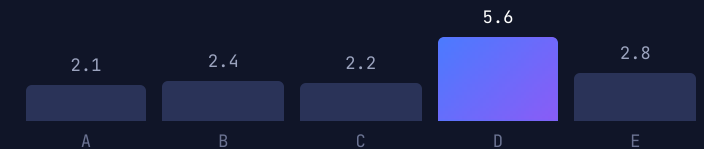

LOGISTICS AND WAREHOUSING

“Which warehouse clients cost more to serve than they pay?”

 Milo 14 sec

Three of 42 clients run below cost to serve. One e-commerce account takes **19% of pick hours** for **8% of revenue**: single-line orders and returns, billed at the pallet rate.

PICK HOURS PER €1K REVENUE · BY CLIENT

MILO OFFERED TO

→ Draft the repricing note for that account
