

MILO FOR BORG & OVERSTRÖM · OCTOBER 2026

Where is the business leaving money on the table?

The screen in the office shows live sales and the month so far. It doesn't show which partners are slipping, which installed dispensers have stopped reordering filters, or how each series is tracking in the Nordics. Milo connects to NetSuite and Pipedrive and answers in seconds. **Then it tells you what to do about it.**

Live in about a week · £1,500 to try it for a month

Which distribution partners need a call this week?

Two partners need a call. The Oslo partner has ordered 41% less than this time last year and **paid its last two invoices late.** Its open deal in Pipedrive hasn't moved in six weeks.

PARTNER HEALTH · LAST 90 DAYS AGAINST THE SAME PERIOD LAST YEAR

PARTNER	ORDERS VS LAST YEAR	DAYS TO PAY	OPEN DEALS	LAST DEAL ACTIVITY	HEALTH
Oslo partner	-41%	58	1	6 weeks	38
Rotterdam partner	-22%	44	0	None	52
Munich partner	-9%	31	2	8 days	66
Leeds partner	+6%	29	4	2 days	78
Stockholm partner	+14%	27	5	Today	84
Dubai partner	+31%	33	3	Yesterday	88

The Oslo partner's last three orders were **filters and spares only**. No new dispensers since June.

I can send each account owner their partners' health every Monday, and alert you the moment **any partner pays two invoices late in a row.**

Set up the alert

Show me Oslo

Where are we leaving money on the table on filters and service?

Nearly 4,200 dispensers sold in the last two years haven't had a filter reordered in twelve months. At trade price that is around £310,000 a year, going to someone else's filters or to no change at all.

INSTALLED IN THE LAST TWO YEARS · SHARE WITH A FILTER REORDER IN THE LAST 12 MONTHS

United Kingdom		86% 6,920 installed
Netherlands		72% 1,640 installed
Germany		66% 2,210 installed
Nordics		48% 2,380 installed
Middle East		39% 1,260 installed

The Nordics and Middle East hold 2,000 of them. The gap is widest on the E6.

I can list the partners with the biggest gap, by series, and add a follow-up to each one in Pipedrive for the account owner.

Create the follow-ups

Show by series

Build me my own view: the Nordics by series, year to date against forecast. Just for me.

The Nordics are 8% behind forecast, and all of it is Sweden. The E6 is ahead. Tap systems are £96,000 short, with £140,000 of tap deals sitting in Pipedrive.

NORDICS · JANUARY TO SEPTEMBER · REVENUE AGAINST FORECAST

SERIES	ACTUAL	FORECAST	AGAINST FORECAST	PIPEDRIVE, WEIGHTED
T1, T2, T3 taps	£412,000	£508,000	-£96,000	£140,000
C2 and C3	£118,000	£131,000	-£13,000	£22,000
E4	£164,000	£172,000	-£8,000	£31,000
E6	£296,000	£261,000	+£35,000	£58,000
B3 and B4	£88,000	£97,000	-£9,000	£12,000
Filters and service	£131,000	£142,000	-£11,000	n/a
Nordics	£1,209,000	£1,311,000	-7.8%	£263,000

Saved. I can send you a snapshot of this every Wednesday at 7am, and add Benelux alongside the Nordics.

Send it on Wednesdays

Add Benelux

ILLUSTRATIVE FIGURES Every number above is sample data shaped like a design-led manufacturer selling through partners, not Borg & Overström's own. During the proof of concept the same questions run on your data.

One screen for the company. Your own view for you.

Phocas does what it was set up to do: live sales and the month so far, on one shared dashboard. Milo replaces it, and the switch can line up with its next renewal.

	MILO	PHOCAS TODAY
Who it's for	Everyone, each with their own views. Margin and turnover only for the people who should see them.	One company-wide dashboard.
Changing a view	Ask: "take out service, put the E6 first, split it by country."	Back to whoever set it up.
Why a number moved	Ask, and Milo traces it to the partner, series and order.	Drill down and work it out yourself.
Beyond reporting	Alerts, Wednesday snapshots, Pipedrive follow-ups and small apps such as a market forecast.	Reporting.

What others found in the first months.

GLOBAL FOOD · MIDDLE EAST Kellogg's Empty shelves, found Coco Pops was already the best seller. Milo showed it running out for two or three days at a time in around 25 stores. More stock went in, and more sold.	BREWERY · UK SUPERMARKETS Two Tribes Accounts at risk, flagged early Two late invoices in a row trigger an alert, checked against what that customer is still ordering. The account manager calls before the orders stop.	NATIONAL DRINKS BRAND · HUNDREDS OF BARS £50,000 a month promotion Proved it was working Tequila barely moved, so the spend looked wasted. Bars in the promotion against bars outside it showed beer sales rising across the board. The spend stayed.

Keeps up with AI. Careful with your data.

THE MODELS

The best one, swapped in

Milo runs on the leading models from OpenAI and Anthropic and moves to each new one as it lands. You get the improvements without changing anything.

THE NUMBERS

Same question, same answer

The language model never does the arithmetic. Milo queries your data and shows its working, so every figure traces back to an order or invoice.

YOUR DATA

Read-only, in the EU

Hosted in Frankfurt, never trains on your data. ISO 27001 and SOC 2, documents at trust.milo.ai.

04 · GETTING STARTED

Live in a week. Decide after a month.

WEEK 0

Connect

Pipedrive in thirty minutes, NetSuite in a day or so. Read-only, done on our side.

WEEKS 1 AND 2

Build

A one-hour kick-off in Norwich, at Moorgate or on Teams. Your named account manager builds the first views with you.

WEEKS 2 TO 4

Test

Bring in sales, finance and the partner team. Check every figure against Phocas and NetSuite. Then decide.

PROOF OF CONCEPT · ONE MONTH

£1,500

Everything included, unlimited users

- A named account manager and engineer
- NetSuite and Pipedrive connected
- Nothing owed after month one unless you carry on

Carry on at **£1,500 a month**, with the same account manager and engineer. Twelve-month term, with a six-month break if you want one.
