

AI already runs through the factory. Mostly one system at a time.

Planners, sensors and cameras each see one system. The questions that matter cross all of them.

PLAN

Demand and schedules

Forecasts demand and sequences the jobs.

LIVES IN

ERP and planning tools

PREDICT

Downtime and scrap

Spots the next machine to fail, and scrap before it happens.

LIVES IN

Machines and the MES

INSPECT

Every part, checked

Vision and gauging on dimensions, finish and defects.

LIVES IN

The line itself

ANSWER

Any question, every system

Margin by job. Downtime, in pounds. Which orders ship late, and why.

LIVES IN

All of them. This is Milo.

YOUR SYSTEMS, LEFT AS THEY ARE

- ERP
- MES and machines
- Planning
- Quality
- WMS
- Maintenance
- CRM and quotes
- Purchasing
- Spreadsheets

READ-ONLY ACCESS
SHOWS ITS WORKING

WHO ASKS, IN THE BROWSER, TEAMS OR WHATSAPP

- Operations
- Planning
- Quality and engineering
- Sales
- Supply chain
- Finance
- The board

Ask the factory anything.

Answers that cross the ERP, the machines and the order book.

Figures are illustrative. On your data every answer traces back to the job, order or invoice.

COMMERCIAL

"Which jobs actually made money last quarter?"

 Milo 13 sec

23 of 140 lost money.

Most were runs under 50: quoted at **31% margin**, delivered at **9%** on average. Setup ran **2.4 times** the estimate.

ACTUAL MARGIN · BY RUN SIZE

MILO OFFERED TO

→ Re-price short runs and flag open quotes

PRODUCTION

"Where are we losing the most machine time?"

 Milo 10 sec

CNC 3. 11 hours a week.

Changeovers run 52 minutes against a 25 minute standard, mostly on nights. About **£170,000 a year**, hidden inside a 71% OEE.

LOST HOURS A WEEK · BY MACHINE

MILO OFFERED TO

→ Send the changeover log to the shift lead

ORDERS

"Which orders will ship late next week?"

 Milo 15 sec

9 orders. 3 customers.

A casting delivery slipped **6 days** and two jobs queue behind CNC 3. On time in full is heading for **88%** against a 95% target.

DAYS OF COVER · KEY PARTS

MILO OFFERED TO

→ Expedite the castings, warn three accounts

ALSO WORTH ASKING

Which supplier stops the line most?

Scrap by machine, shift and material?

Which quotes did we lose on price?

Who is over 60 days and still ordering?

One live board for the whole factory.

Production, quality, orders and finance.
