

THE MORNING REPORT

MILO FOR HECKFIELD PLACE · HAMPSHIRE · SEPTEMBER 2026

HOW DID THE HOUSE DO YESTERDAY?

At Heckfield the answer goes out at seven each morning, pulled from HART and pasted into Excel by hand. Milo connects to HART, your purchasing system and Sage Intacct, builds the same report itself and has it waiting at seven. Then it answers the question that comes next.

HOSTED IN FRANKFURT

ISO 27001 AND SOC 2

READ-ONLY CONNECTIONS

NEVER TRAINS ON YOUR DATA

LIVE IN A WEEK

YOU How did the House do yesterday?

Saturday took £75,375, **3.5% ahead of budget**. 43 of 46 rooms sold at an average rate of £895. **Hearth was the one department behind.**

ROOMS SOLD	OCCUPANCY	AVERAGE RATE	REVPAR
43 of 46	93.5%	£895	£837

DAILY REVENUE · SATURDAY 19 SEPTEMBER · SENT 07:00				
DEPARTMENT	YESTERDAY	VS BUDGET	MONTH TO DATE	VS BUDGET
Rooms	£38,485	+6.3%	£612,340	+3.1%
Marle	£11,920	+4.6%	£188,450	+1.2%
Hearth	£9,640	-6.4%	£162,780	-4.8%
Moon Bar and Workman's Bar	£4,870	+8.2%	£71,260	+5.5%
The Bothy	£7,310	+4.4%	£121,900	+2.0%
Events, The Cellar and other	£3,150	-7.4%	£58,640	-2.2%
TOTAL	£75,375	+3.5%	£1,215,370	+1.4%

HOW I GOT THERE

- Rooms is **six HART codes added together**: accommodation, package allocation, cottages, upgrades, late departures and no-show charges. Finance agreed that list in week one and can change it at any time.
- Hearth finished 6.4% behind on **14 fewer covers** than a typical Saturday. Spend a head held, so the gap was tables, not the bill.
- Every figure ties back to HART's night audit. Click a line to see the postings behind it.

HART · NIGHT AUDIT

HART · TRANSACTION CODES

SAGE INTACCT · BUDGET 2026

I can send this to the same list at 07:00 every day, with the things worth knowing written at the top. **Your team checks it instead of building it.**

SCHEDULE FOR 07:00

SHOW ME THE CODE MAP

YOU

In the restaurants and bars this month, how much is residents and how much is outside guests?

Outside guests bring in 39% of Marle's revenue and spend **£24 more a head** than residents. In Hearth and the Moon Bar it is almost all residents.

REVENUE BY GUEST · SEPTEMBER TO DATE

■ Residents ■ Outside guests

Marle, spend a head: residents **£94**, outside guests **£118**.

HOW I GOT THERE

- A resident is any bill posted to a room, or matched to an in-house reservation in HART. Everyone else is an outside guest. **That rule sits in the code map with the rest**, so every report counts it the same way.
- Marle's outside guests cluster on Friday and Saturday dinner and Sunday lunch. **Tuesday to Thursday they are 14% of covers**, on nights when the House averages 74% occupancy.

HART · RESERVATIONS

HART · OUTLET POSTINGS

HART · SPA BOOKINGS

I can add this split to the morning report, and flag any midweek night where the House is under 75% full and Marle has tables free, **while there is still time to fill them**.

ADD TO THE REPORT

NOT YET

YOU

Where are we against budget this month, and what is moving food cost?

September revenue is **1.4% ahead of budget**. Food cost is **31.6% against a budget of 29.4%**, and Marle accounts for most of the gap.

FOOD COST AGAINST BUDGET · SEPTEMBER TO DATE

■ Over budget ■ Under budget | Budget

HOW I GOT THERE

- Two things explain most of Marle's gap. **Fish and shellfish is up 9% a kilo since August**, from the same supplier on the same order pattern.
- One dry goods invoice for **£1,840 appears twice in Sage Intacct**, posted four days apart under the same invoice number. I have not changed anything.

PURCHASING · INVOICES AND PRICES

SAGE INTACCT · LEDGER AND BUDGET

HART · OUTLET REVENUE

I can message you when a supplier's price on a top 50 line moves more than 5%, and when an invoice number appears twice. **You decide what happens next**.

ILLUSTRATIVE FIGURES

Every number on this page is sample data shaped like a 46-bedroom house, not Heckfield's own. During the proof of concept the same questions run on your data.

SIX CODES IN HART. ONE LINE ON THE REPORT.

Room revenue sits across five or six transaction codes, and every department has a set of its own. Which codes belong together is agreed with finance once, written down in plain English, and used by every report, dashboard and answer from then on.

WHAT FEEDS EACH LINE · SATURDAY 19
SEPTEMBER

1000	Accommodation	£31,240
1010	Accommodation, package allocation	£3,980
1020	Cottages	£2,350
1030	Room upgrade	£540
1040	Late departure	£225
1090	No-show and cancellation	£150

ROOMS, ON THE REPORT

£38,485

Illustrative codes. The real list comes out of HART in week one.

01 YOUR REPORT IS THE BRIEF

We start from the report that goes out at seven and the HART back-files behind it. Milo drafts the map from the code descriptions, and your account manager goes through it with finance line by line.

02 WRITTEN DOWN, IN ENGLISH

The map lives in Milo's knowledge base, where finance can read it and change it. A new code or a new outlet is a one-line edit, and everything built on top picks it up.

03 THEN IT HAS TO MATCH

For the whole month Milo's report runs beside the one built by hand, and the two must agree to the pound. **The arithmetic is never done by the language model.** Milo writes a query, runs it on your data and shows its working, so the same question returns the same number every time.

THE POWER BI PROJECT, WITHOUT THE PROJECT.

Power BI is a capable tool for a business with someone to build it and look after it: the connections, the data model, the refreshes, the licences. Milo arrives with the connections built and an account manager who sets up the first dashboards with you. After that, a new dashboard is a sentence.

	MILO	POWER BI
GETTING CONNECTED	HART, your purchasing system and Sage Intacct connect directly through their APIs, or through a data lake if you prefer. Our engineers build the connections and look after them.	Connectors, a gateway and a data model to design before the first chart. A consultant's project, or a job for whoever in finance has the time.
A NEW DASHBOARD	Ask for it in plain English. The first set is built with your account manager, from the reports you already send.	Built in Power BI Desktop with DAX formulas, then published. Every change goes back to whoever built it.
THE SEVEN O'CLOCK REPORT	Built and sent on schedule, with the things worth knowing written at the top.	An email subscription that sends a picture of a dashboard.
ASKING WHY	Every tile answers follow-up questions, down to the posting in HART.	Fixed views. A new question is a new report.
WHO CAN USE IT	Unlimited users, no seat licences. A restaurant manager sees their own restaurant. Salaries stay with finance.	A licence for each person, and roles to configure in the model.
BEYOND DASHBOARDS	Alerts, and small apps such as the event revenue estimator from the demo.	Dashboards.

AND COPILOT Copilot stays. It is good with documents and email. Milo is for the numbers, and it gives everyone the same ones.

WHERE HECKFIELD'S DATA GOES

WHERE IT RUNS

Milo's EU cloud in Frankfurt. Connections are read-only: Milo never writes to HART, the purchasing system or Sage Intacct. An NDA is signed before anything connects.

WHAT NEVER HAPPENS

No training on your data. Nothing is sent to OpenAI or any outside AI service. The models run inside Milo's own cloud under zero data retention.

WHO SEES WHAT

Roles are agreed before anyone logs in, and guest names can be left out altogether: the morning report needs revenue codes, not people. ISO 27001 and SOC 2, with the documents at trust.milo.ai.

WHO ELSE RUNS ON MILO.

Three hospitality groups, and one global name.

BEACH CLUBS, HOTELS AND RESTAURANTS · WORLDWIDE

NIKKI BEACH

One view of every venue

Luxury venues across Europe, the Middle East, the Americas and Asia, each on its own mix of systems. When a VIP arrives, Milo messages the floor so the champagne is on the table.

PUBS AND BARS · LONDON

URBAN LEISURE GROUP

Five systems, under two weeks

Every Monday somebody logged into five systems and rebuilt the numbers by hand. All five were connected in under two weeks, with no data engineer and no warehouse project.

BREWERY, TAPROOM AND WHOLESALE · LONDON

TWO TRIBES

1 to 12 users in six weeks

Seven systems that had never spoken to each other. Seven weeks on, twelve people across sales, finance and production build their own dashboards, and finance gets a message when an invoice goes overdue.

GLOBAL FOOD · COMMERCIAL FINANCE

KELLOGG'S

Dozens of markets

The commercial finance team asks Milo directly, across dozens of markets and hundreds of products. It runs inside their own cloud, on their terms.

REFERENCE CALLS We will put you in touch with any of these teams before you decide.

ONE MONTH. £1,500. THEN YOU DECIDE.

A working deployment on Heckfield's own data. HART, your purchasing system and Sage Intacct connected read-only, the code map agreed with finance, and the seven o'clock report running beside the one built by hand, so every figure can be checked against your own.

Start in October and the report has been building itself for weeks before the House fills for Christmas.

£1,500

ONE-MONTH PROOF OF CONCEPT · EVERYTHING INCLUDED

- ✓ HART, purchasing and Sage Intacct connected, read-only
- ✓ The code map, agreed line by line with finance
- ✓ The seven o'clock report and your first dashboards, built with you
- ✓ Unlimited users, no seat licences
- ✓ An account manager and an engineer all month

Stop at the end of the month and nothing more is owed. Carry on and it is twelve months at **£1,100 a month** for the finance team, or **£1,500 a month** for the whole House: around twenty people, each seeing only their own department.

REPLY TO TOM · tom@milo.ai

FIRST · THE BACK-FILE TEST

Send a few HART back-files and one morning's report. We rebuild the report from the files and you check it line by line, before anything is signed.

WEEK 1

NDA signed. HART, purchasing and Sage Intacct connected. Code map agreed.

WEEKS 2 AND 3

The seven o'clock report runs beside the manual one. First dashboards built.

WEEK 4

Check the month against your own figures. Carry on, or walk away.
