

AI already runs through the factory. Mostly one system at a time.

Planners, sensors and cameras each see one system. The questions that matter cross all of them.

PLAN

Demand and schedules

Forecasts demand and sequences the lines.

LIVES IN

ERP and planning tools

PREDICT

Yield and breakdowns

Spots yield loss and the next machine to fail.

LIVES IN

Line systems and MES

INSPECT

Every pack, checked

Vision and X-ray on fill, seal, label and foreign bodies.

LIVES IN

The line itself

ANSWER

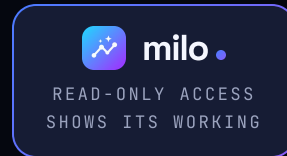

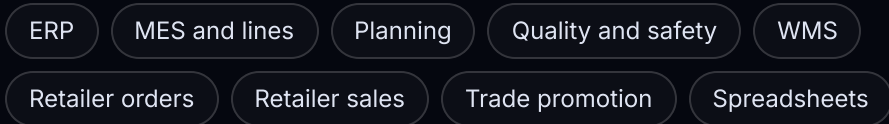

Any question, every system

Margin by SKU. Promotions that paid. Waste by shift, in pounds.

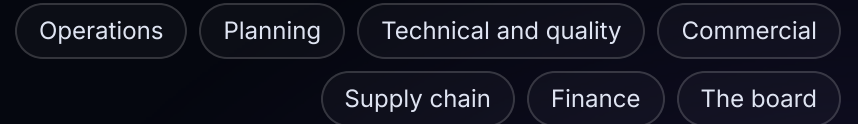

LIVES IN

All of them. This is Milo.

YOUR SYSTEMS, LEFT AS THEY ARE

WHO ASKS, IN THE BROWSER, TEAMS OR WHATSAPP

Ask the factory anything.

Answers that cross the ERP, the lines and the retailers.

Figures are illustrative. On your data every answer traces back to the batch, order or invoice.

COMMERCIAL

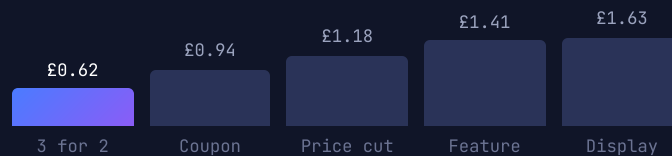

"Which promotions actually made money last quarter?"

Milo 13 sec

11 of 38 lost money.

The 3 for 2 on family cereal lifted volume **41%** and cut margin per case from **£4.10 to £1.35**.

RETURN PER £1 OF TRADE SPEND · BY MECHANIC

MILO OFFERED TO

→ Send the loss-makers to account managers

PRODUCTION

"Which line is giving product away?"

Milo 10 sec

Line 3. £14,200 a week.

2.8% overfill against a 1% target, mostly on nights after the 500 g changeover. OEE never moved, so nobody saw it.

GIVEAWAY · BY LINE

MILO OFFERED TO

→ Alert the shift lead when it passes 1.5%

SUPPLY CHAIN

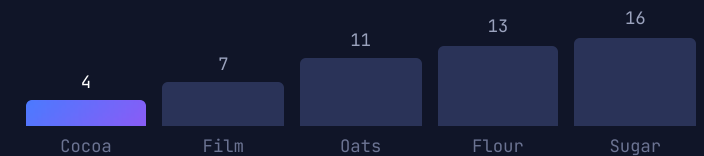

"Which orders will we short next week?"

Milo 15 sec

Six SKUs. Two retailers.

Cocoa covers **4 days** against a 9 day lead time. Service level is heading for **94.1%** against a 98.5% target.

DAYS OF COVER · KEY INGREDIENTS

MILO OFFERED TO

→ Chase the supplier and warn both accounts

ALSO WORTH ASKING

Which complaints share a supplier lot?

Margin by SKU at today's prices?

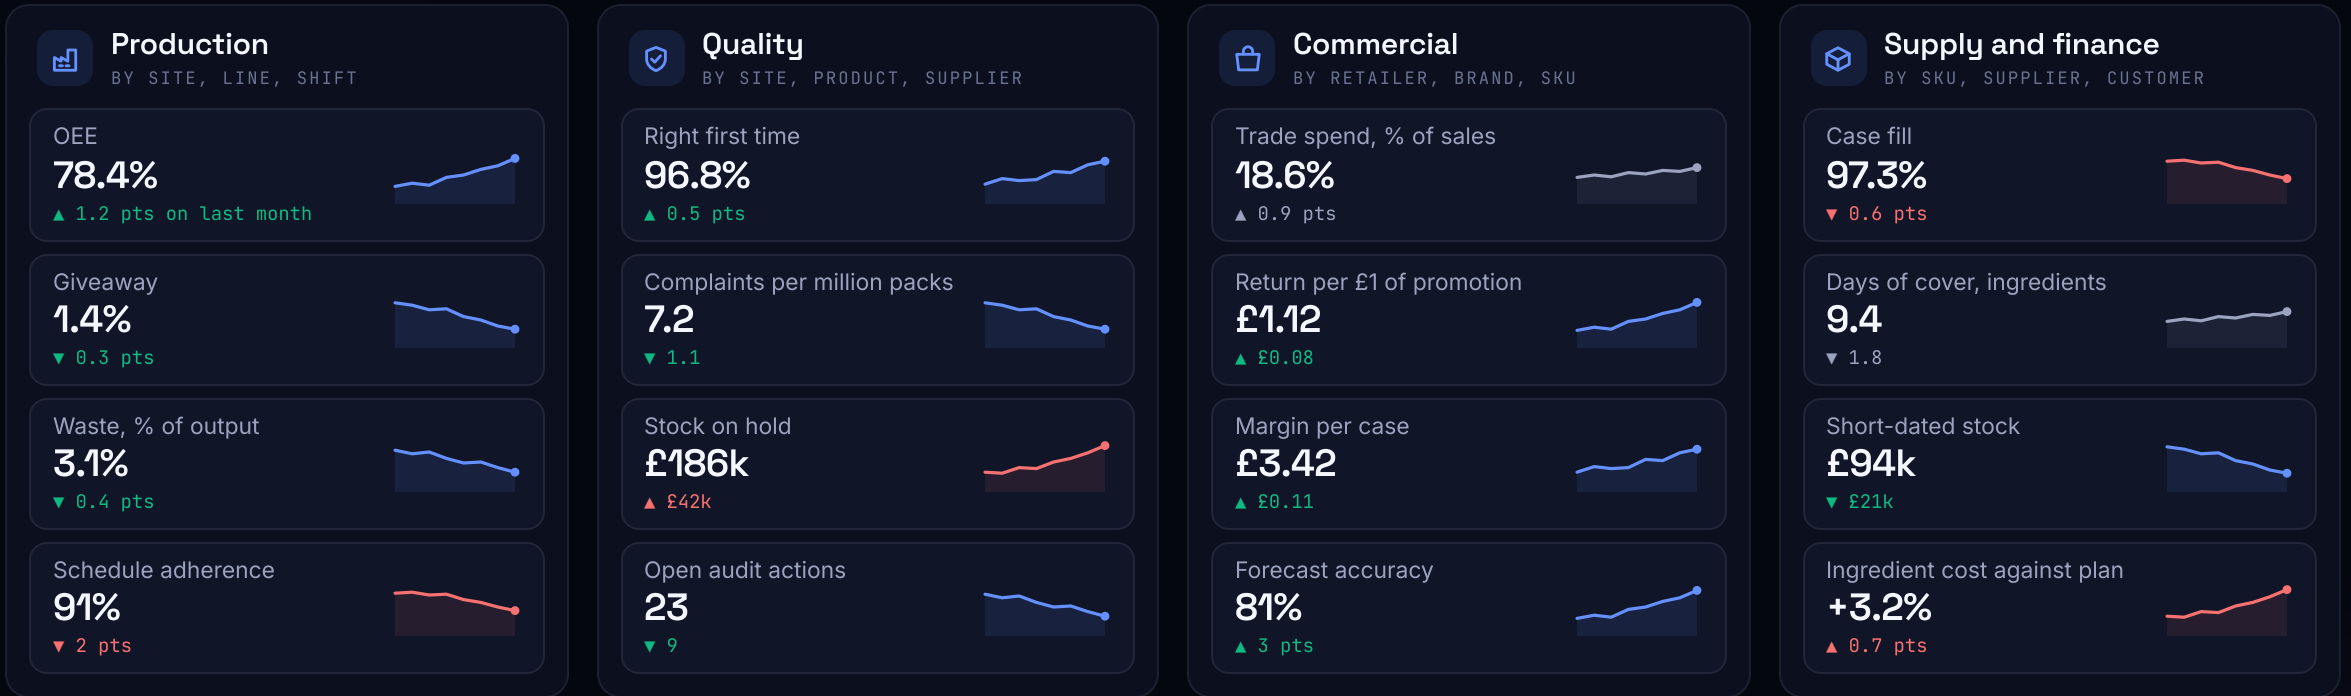

Where did waste jump after a changeover?

Who do we short most?

One live board for the whole factory.

Production, quality, commercial and supply.

on them.

The 06:30 brief

Yesterday's output, waste and case fill, in
every manager's inbox.

Alerts

Giveaway past 1.5%. Cocoa under five
days. A complaint that matches a batch.

The Monday pack

The weekly pack builds itself.

A global cereal maker and a London brewery. Both ask Milo.

These figures are real. Full Two Tribes story:

GLOBAL FMCG
COMMERCIAL FINANCE AND OPERATIONS

Trade spend, promotions and margin. One view.

Dozens

of markets

Hundreds

of SKUs

Their cloud

the data never leaves it

- Month end took **days of manual work**. Now they just ask.
- Gross margin, promo performance and price realisation come back **together**.

Milo joined up scattered data and surfaced a **Coco Pops shortage in the Middle East** that nobody had spotted.

THE CATCH

BREWING, LONDON
WHOLESALE, RETAIL AND TAPROOM

Every department got an analyst in seven weeks.

7 weeks

to every department on
dashboards

1 → 12

users in six weeks, no
rollout

12×

more questions in a month

- **Seven systems** connected in two weeks. No data team.
- **20 dashboards, 20 apps, 4 alerts**, plus a Tesco analyser across all **831 stores**.

"People asked for tools after seeing what a colleague had built."

TWO TRIBES BREWING
