PREPARED FOR BETGOODWIN

Every customer, from sign-up to safer gambling review, in one place you can ask.

Gameplay and payments in EveryMatrix. Risk scores in MindWay. Conversations in live chat. Documents in SharePoint, casework in Monday. Milo connects all five, keeps them live and answers in plain English. The manual workaround behind every alert goes.

EveryMatrix · MindWay · Live chat · SharePoint · Monday.com · → Milo

01 · WHAT CHANGES ON EACH DESK

Four desks. One set of facts.

AML and safer gambling

- A customer moves to high risk. The reviewer gets **deposits, withdrawals, gameplay and chat** in one alert.
- Every review timed, from alert to decision.
- SharePoint KYC and source of funds read against **your risk policy**, with a rating to sign off.

Customer Services

- Live chat and email **feed the safer gambling picture**: chasing losses, money worries, frustration.
- Agents see what they can tell a customer, and nothing they can't.
- Contact volumes and topics by day, so a spike shows the morning it starts.

Payments and operations

- Deposits, withdrawals and declines **live from EveryMatrix**.
- An alert when money goes in and straight out, barely played.
- Open cases on your Monday boards, next to the data.

Data protection

- **Access set by role.** Hidden fields stay hidden, even on a shared dashboard.
- Anything sent outside is a snapshot nobody can question.
- Read-only connections. Every question logged.

02 · THE KIND OF QUESTION YOUR TEAM WILL ASK

Ask it. Milo does the joining up.

Milo · BetGoodwin workspace — AML desk

YOU **How long did high-risk reviews take last month, and where did they stall?**

36 customers moved to high risk. Median 3.1 days from alert to decision. Nine waited more than a week, seven of them on source of funds.

WAITING ON	REVIEWS	MEDIAN	HOURS
Decided on the data	21	1.4 days	18
Fresh proof of ID	8	4.2 days	11
Source of funds	7	9.6 days	23

WHAT MILO CHECKED

- ✓ Every **MindWay** score change, joined to **EveryMatrix** transactions.
- ✓ The **live chat** history for each of the 36.
- ! Three of the seven are **still depositing** while they wait.

Chase the seven SoF requests | Alert me past five days | Add the three to Monday

Illustrative figures. Once EveryMatrix and MindWay are connected, the same question runs on your own customers.

03 · WHY MILO

Your data, your rules, answered now.

Live, not last week

The question asked in the morning meeting gets answered **in the morning meeting**, not in next week's pack.

Facts, not flattery

Milo won't massage the numbers. Calculated on your full data, **never estimated by the AI**.

Anyone can build it

Dashboards, apps, alerts and the monthly board email, built by asking. **No IT ticket, no pivot tables.**

It learns how BetGoodwin works

Your risk profiles and thresholds, set once in **company knowledge**, so every desk works off the same rules.

MINDWAY

Keep MindWay. Milo makes it complete.

Milo reads MindWay's scores through its API and adds what MindWay can't see: **live chat, CS emails, SharePoint documents and Monday cases**. Then it tracks what happens after each alert.

FOR YOUR DPO

Built for a licensed operator.

Hosted in the EU, read-only, never used to train a model. Your NDA signed before anything connects. Documents at **trust.milo.ai**, and every question answered in writing.

✓ **SOC 2 Type II** ✓ **ISO 27001** ✓ **GDPR** ✓ **Pen tested**

04 · BUILT INSIDE GAMING

Milo started at BetGames. Gaming runs on it now.

BetGames
Live dealer games
Reports from 3 days to 3 minutes. Flagged players watched live.

Tsogo Sun
Casinos and hotels, South Africa
Live on their data warehouse.

Lithuanian lottery
National lottery
Replaced an outsourced report under a strict regulator.

Octoplay
Game studio, Malta
Gaming data and promotions in one place, used daily.

Betcity
Online operator
An operator like you, on Milo today.

7bet
Online sportsbook and casino
Another operator running on Milo today.

Intelligent Gaming
Gaming platform, South Africa
Reporting and player marketing across 30+ operator brands.

Talk to them
Reference calls
We'll put you in touch with any of these teams before you decide.

05 · ONE MONTH

Four people in a room, then the rest of the business.

Week 1
Live by Friday
All five sources connected. The first AML view is live: every customer's risk score, deposits and withdrawals in one place.

Week 2
Built with you, in Uckfield
Your account manager on site. Each desk builds its first dashboards and alerts.

Week 3
Running on its own
Risk alerts live, permissions set. The next ten people come in.

Week 4
You decide
Look at the hours saved. Carry on, or walk away and we disconnect everything.

PROOF OF CONCEPT

£2,000 one month

- All five sources connected for you
- An account manager on site and on call
- As many people as you want using it

AFTER THE MONTH

£2,200 a month

For around 50 to 60 people, depending on usage. No lock-in: decide at the end of the month. No seat licences and nothing to maintain on your side.
