

BUILD IT OR LEASE IT · THE OFFER, IN WRITING

Two ways to get your AI.

One is in stock.

Fleet UK wants something bespoke, control of its own data and ownership of what gets built. **Right on all three.** Here are the two ways to get there, set out like any deal you put in front of a customer: cost up front, cost a month, and when it turns up.

FACTORY ORDER

BUILD SLOT: TBC

Artist's impression. Not yet built.

In-house AI hire

Mid-level · 1 seat · manual

Delivery **18-24 months**, after a 3-6 month search

Permanent contract

Initial rental £14,000 (the recruiter)

No fixed term. Can hand in its notice

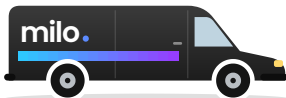

One pair of hands, 37.5 hours a week

£6,756

a month, inc NI and pension

IN STOCK

HOT DEAL

Actual product. 30 paying customers, none have left.

Milo

Fully maintained · unlimited seats · automatic

Delivery **within 1 week** · Navigator integration included

Trial, fully refundable

Initial rental £1,500, back if you'd rather hire

No tie-in. Hand the keys back

Unlimited users, no seat licences

£1,500

a month, all in

The two-year bill

Two years of each. One of them is live for 103 of the 104 weeks.

In-house hire		£176,000	£95,000 of it in year one, still mid-build
Milo		£36,000	£18,000 a year. Build, hosting, maintenance and support included

Hire figures are estimates: £70,000 salary, employer NI at 15%, 3% pension and a 20% recruiter fee. Cloud and AI bills not counted. Put your own numbers in and the gap stays.

Compare the spec

Where 18-24 months comes from: a prototype takes a month. A version your team can trust with finance and compliance numbers took Milo's engineers over two years and about £1m.

	In-house AI hire	Milo
On the road	✗ 3-6 months to recruit. Then the build starts.	✓ First answers within a week of connecting Navigator.
Bespoke to Fleet UK	⚪ Eventually. One build at a time, by one person.	✓ From week one. The WIP review, double-reservation alerts and complaints history all get built during the trial.
The Navigator API	✗ Their problem, on their own.	✓ Our problem, however it was put together.
Holiday or resignation	✗ Work stops. If they leave, so does the know-how.	✓ A team of engineers. Nothing stops when one is away.
Security, permissions	✗ Written from scratch by one mid-level engineer.	✓ Built already: ISO 27001, role-based access, audit log.
Your data	✓ Yours.	✓ Yours. Read-only, UK hosted, never used to train a model.
Your IP	⚪ Yours on paper. In practice, in one person's head.	✓ Yours. If Milo ever stops trading, you get the code.
If it doesn't work out	✗ A second recruiter fee and a half-built system.	✓ Your £1,500 back.

The offer, in writing. £1,500, and you get it back.

All six points go in the contract.

1

£1,500 for the trial

Six weeks on Fleet UK's own data. The clock starts the day Navigator is connected.

2

Give it a fair run: 200 interactions

Across the team, that is about seven questions a working day. Enough for a proper test drive.

3

Still rather hire? Full refund

Use your 200, decide not to continue, and we return the £1,500. No discussion.

4

Carry on at £1,500 a month

Unlimited users. Build, hosting, maintenance and support all included.

5

Your data and your IP stay yours

If Milo ever stops trading, the code is released to you to run yourselves.

6

Keep recruiting while you try it

Nothing here stops you. The search takes months. Milo is live in the meantime.
